

## RoHS and REACH Certificate of Compliance

### RoHS:

Based on information obtained from our suppliers, this document certifies that ALL K-Rain products are “RoHS-5” compliant and do not exceed the designated levels of Cadmium, Hexavalent Chromium, Mercury, Polybrominated Biphenyls or Polybrominated Diphenyl Ethers legislated under the provisions of the European Parliament and Council Directive on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (2002/95/EC) and the regulations promulgated there under, collectively, the “RoHS Regulations.”

### REACH:

Based on information obtained from our material and components suppliers, this document also certifies that no K-Rain products contain Substances of Very High Concern (SVHC) as listed by the European Chemicals Agency (ECHA) under the provisions of Regulation (EC) No. 1907/2006 of the European Parliament and of the council concerning the Registration, Evaluation, Authorization, and Restriction of Chemicals (REACH) per the ECHA 20/12/2010 and previous updates.

The provisions of this certificate replace the provisions of all other certificates previously delivered relating to compliance with the RoHS Regulations.

### K-Rain and the Environment:

**K-RAIN GROWS GREEN is a philosophy of conservation and environmental responsibility that guides our product development, manufacturing process and corporate culture.**

We are doing our part to prepare a greener future for generations to come through our everyday activities:

- We design high quality irrigation products that enable the efficient use of water and water recycling.
- We evaluate and invest in our manufacturing facilities and processes to continually consume less of the earth's diminishing resources.
- We strive for zero waste in all our activities. From our corporate offices to the factory floor, we promote the recycling of all materials back into nature or the marketplace in a manner that protects human health and the environment.
- We foster a corporate culture of social and environmental responsibility that includes: volunteering and sponsoring social programs in the communities in which we live and operate; developing a digital strategy that reduces total supply chain paper consumption; developing educational programs for the irrigation industry that promote water recycling and conservation.
