

RAIN SENSORS

The Rain/Freeze and Rain Sensors will turn your irrigation controller into an expert water manager by efficiently suspending watering during rain and/or freeze periods.

After a set amount of rain has fallen and/or freezing temperatures exist (for models with freeze sensor), the sensor will trigger the controller to suspend watering.

The K-Rain Universal Rain Sensor Receiver allows a K-Rain Wireless Rain/Freeze Sensor to be paired with any manufacturer's controller – providing a cost-efficient option to add a wireless rain sensor to irrigation systems.

Unlike other Rain Sensors on the market, the K-Rain® wireless rain-freeze sensor (model 3208-WRFS) can be paired with multiple K-Rain PRO EX 2.0 Wifi enabled controllers within range, providing an additional value for the end user. The wired rain sensors work with closed circuit timers.

Features and Benefits

UNIVERSAL RAIN SENSOR RECEIVER

- Flexibility. Allows a K-Rain Wireless Rain/Freeze Sensor to be paired with any manufacturer's rain sensor terminal-equipped controller.
- Simplicity. Provides the advantage of extremely quick, easy installation and programming, along with simple pairing with a K-Rain Rain Sensor.
- Weather Resistant. Engineered with impact modified, UV resistant polymer for outdoor exposure.
- Maintenance Free. No batteries to replace.

RAIN/FREEZE SENSORS

- The K-Rain Wireless Rain/Freeze Sensor (model 3208-WRFS) can be paired with multiple K-Rain PRO EX 2.0 WiFi enabled controllers within range.
- 2 in 1 Mounting. Provides flexible installation with standard flat & gutter mounting.
- Models 3208-WRFS and 3208-HRFS include a freeze sensor that prevents the irrigation system from starting when temperatures drop to 37°F or below.
- Hardwired models are compatible with any manufacturer's rain sensor terminal-equipped controller.

Models

3208-HRS	Hardwired Rain Sensor
3208-HRFS	Hardwired Rain-Freeze Sensor
3208-WRFS	Wireless Rain/Freeze Sensor for PRO EX 2.0 or PRO EX 2.0 WiFi
3208-WRFS-KIT	Wireless Rain/Freeze Sensor and RF Module for PRO EX 2.0
3208-UWRFS	Universal Wireless Rain/Freeze Sensor

How to Specify

Model Number: 3208-HRFS

Description: Hardwired Rain-Freeze Sensor
